MORPHOLOGY AND URBAN DESIGN

new strategies for a changing society

Since the beginning of the third millennium, the rapid changes that contemporary societies are facing are radically transforming the perception and the structures of our cities. New topics seem to dictate the political agenda, suggesting alternative options to manage the emerging urban mutations.

An increasingly "data driven society" is forcing the migration into an almost immaterial world, prompting Information and Communication Technology together with the Smart City.

The crisis of the traditional real estate industry, propelled by the global finance system, is contributing to re-evaluate the theme of Public Space as a "space of encounter, sharing, experience and inclusivity", mapping the everyday life to discover unexpected Urbanities, through the application of innovative strategies and tools.

The deficiencies of representativeness in Democracies are addressing us with new social, economic, cultural roles, inviting human beings to perform as strategic Agents of Change. As an immediate consequence, new "forms" of cities are strongly brought to our attention: the "city of sharing", the "city of temporariness", the "city of Life between buildings", giving an unexpected impulse to incremental Urbanism of evolving cities.

In such a way, the very idea of the city is radically under discussion. We are then required to answer these numerous questions in order to define the scientific coordinates for the City of the 21st century. In that respect, the conference is calling experts in the field to reflect upon the following main topics:

- > COMMUNITIES AND GOVERNANCE <
- > NEW METHODS AND TECHNOLOGIES FOR THE URBAN ANALYSIS <
- > READING THE CHANGING URBAN FORM <
- > DESIGNING A SUSTAINABLE URBAN FORM <
